

## OUR SIX POINT GUARANTEE TO YOU!

- ✓ **Guaranteed satisfaction for all parts of your electrical project or labour will be fully refunded and work redone to the appropriate standard for free for the part of the project that is not 100%.  
(Leading Edge's money back guarantee).**
- ✓ **Guaranteed clean-up of your site for all work done by Leading Edge or we will send you and your partner to the movies on us.**
- ✓ **Guaranteed to be on time. If for any reason, we will be late, we will contact you prior to the meeting time or the first hour will be free.**
- ✓ **Leading Edge guarantees all material we supply against fault for two years after install or we will replace free of charge.**
- ✓ **Leading Edge stands behind its lifetime workmanship guarantee. If any product fails due to our workmanship, we will repair and replace for free, for life.**
- ✓ **At Leading Edge, we understand how important our customers are. We therefore do our utmost to ensure our customers are totally satisfied with our service. We therefore only employ staff that are polite, helpful, good communicators and easy to approach with questions or ideas. Our staff understand how important you are to us. After all, you are indirectly paying their wages!**

“Leading Edge guarantees are based around you. Our goal is to ensure ALL our customers are absolutely rapt with our 1st class service.

Mistakes can and do happen, a company can be measured by how they respond to these and with our **SIX POINT GUARANTEE** it ensures you will be happy in knowing we back our product and service 100% and you will reap rewards for any downfalls.

They are all risk free and there is no way you can lose with our iron clad guarantees.

Sincerely,

Brad Martin

better air = better health

# HOME VENTILATION SYSTEMS

## Why ventilate my home?

Fresh air circulating in your home makes for a healthier living environment. Better air reduces the risk of being infected by viruses, mould issues, asthma and other respiratory problems, smoke and carbon monoxide inhalation, and moisture damage inside your home.

SmartVent systems for your home include positive pressure ventilation, heat transfer and energy recovery systems. SmartVent offers solutions that draw fresher, drier air into your home through a high efficiency filter. This introduced air forces out the moist, stale air that causes condensation, mould and mildew that damages our homes and makes us sick.

## What's the best SmartVent for my home?

There are five, high quality SmartVent systems, all with a 5-year warranty. While all provide better air for your home and better health for those inside your home, some offer additional features and benefits such as sensors to detect humidity, or use recovered energy to heat incoming air. There is a system to fit every budget and requirement.

## FREE home assessment

Brad and the team at **Leading Edge Electrical** would love to help you decide which is the best system for your home. We offer a FREE in-home assessment, so you get the best SmartVent system installed and better air in your home.
